**Subject: Monitoring Well Abandonment Report
 5352 Old Redwood Highway, Santa Rosa, California
 SCDHS-EHD Site #00014186; NCRWQB Site #1TSO770**

Dear Ms. Bering:

This letter presents the results of our monitoring well abandonment procedures performed at the subject site. The subject site is approximately located as shown on the Site Location Map, Plate 1. The work performed complied with directives outlined in a November 2, 2005 letter from the Sonoma County Department of Health Services Division of Environmental Health (SCDHS-DEH).

On November 7, 2005 Trans Tech Consultants and Clear Heart Drilling, of Santa Rosa, California performed the monitoring well abandonment procedures at the subject site. A total of three, 2-inch monitoring wells (MW-1 through MW-3) were abandoned. The locations of the former monitoring wells are shown on the Site Plan, Plate 2. Clear Heart Drilling is a C-57 licensed contractor, and the monitoring wells were abandoned in accordance with State and local guidelines. The wells' seal and sand pack were over-drilled using hollow stem auger equipment. The PVC well casings were then removed from the holes. The holes were backfilled with a cement bentonite grout to within two feet below ground surface and then filled with soil to the surface. Mr. Cliff Ives of the SCDHS-DEH was onsite to observe a portion of the well abandonment procedures. The metal well boxes, the concrete seals and the PVC casings were separated from the drill cuttings and disposed of in offsite garbage bins. The remainder of the drill cuttings were placed in three 55-gallon drums and stored onsite. In addition, two 55-gallon drums of purged groundwater from the monitoring wells and rinse water from the well abandonment procedures were onsite.

On November 18, 2005, the three drums of drill cuttings were disposed of at Redwood Landfill in Novato, California under manifest. On November 21, 2005, the two drums of purged groundwater and rinse water were disposed of at InStrat, Inc. of Rio Vista, California under manifest. Disposal documentation has been provided in Appendix A.

We trust that this provides the information you require at this time and we appreciate the opportunity to be of service to you. If you have any questions or require any additional information, please feel free to contact us at (707) 575-8622 or www.transtechconsultants.com.

Sincerely,
TRANS TECH CONSULTANTS

Name: Trane Tech Consultants
Address: 830 Shiloh Rd., Bldg. 44, Suite J
Windsor, CA 95492
Contact: Mr. Brian Haak Tel: (707) 575-8622

DESCRIPTION

Description of water: Monitoring well purge water/rinse
Volume/Weight/Quantity: 2 Units: DRUMS

This non-hazardous waste water is monitoring well purge water, super rinse, sampling equipment rinse, tank rinse, combination thereof, or as described above. Described water may contain hydrocarbons. I certify that the above named material has been properly described and classified according to applicable regulations, and possesses no characteristics that would require its handling as a hazardous waste.
